

About our Program

Our mission is to instill a love of learning in a safe, child-centered environment while meeting the needs of every child, every family, every day.

We believe...

...in the power of play. Brain research tells us that young children learn best through play. We actively engage children in learning using play and developmentally appropriate practices.

...in providing a loving, safe, and nurturing environment that promotes healthy social, emotional, cognitive, communication, and physical development of all children.

...preschool forms the basis for all learning that is to come. Our curriculum is based on the KY Early Childhood Standards and is directly related to the core academic standards in elementary school.

...in the power of family. We know that YOU are your child's first teacher. We support families by providing information about community resources and helping you access those resources.

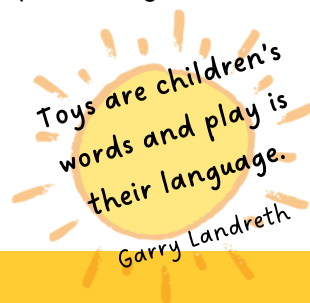

Why Play Based?

Play in children's development has been researched for over a century. Play is children's work. Play is how children learn.

When children play they:

- Develop communication skills
- Learn self regulation skills
- Learn new information
- Extend their thinking
- Develop cognitive skills
- Learn and practice social skills
- Resolve conflicts
- Problem solve
- Cooperate with others
- Learn about themselves
- Explore rules, interests, skills, and relationships
- Develop fine and gross motor skills
